

Kitich Camp is in a 180,000 acre section of Northern Kenya's remote Mathews Ranges. The concept of **Kitich Camp** is one of enjoying nature simply, without impacting on the environment. It is a forested landscape, with huge fig trees and the oldest cycads in the world. Within this forest, wildlife such as vervet monkeys, warthogs, dik-dik, hyena, waterbuck, duiker, lions, leopards and buffalo make their home.

Kitich Camp also offers superb birdwatching. However it is really the elephants which are the star attraction most of the year, as Guilio leads his enthralled guests through the forest to get a very close look at these magnificent animals. There are 30 miles of trails through the forest around **Kitich camp**, taking in peaks and valleys, rivers and waterfalls –and even a good swimming spot. It is truly beautiful.

The accommodation at **Kitich camp** is in large semi-permanent tents, with an open bathroom (bucket shower, long drop loo and wash basin) right behind the tent. The tents are very comfortable, with good beds, small cupboard and table and a verandah. The main living area is one very large room used for dining and sitting. It also houses the bar. The food is as good as it should be with an Italian food-lover overseeing it! A delicious mix of Italian and Middle Eastern, with barbeques too. There is electricity only morning and evening, and rooms are lit with oil lamps. **Kitich Camp** takes a maximum of eight guests, as Guilio wants the experience to be a personal one.
