

Highlights: Tourist Attraction, Caldera Lake, Beautiful Landscapes, Mt Kilimanjaro & Mawenzi Peaks, Variety of trees and Wildlife, Birding and Nature walk, Savannah Woodland, Swimming, Fishing among others

Crater Lake Chala also known as Dschalla is a unique caldera located at the border of Tanzania and Kenya on the eastern edge of Mt Kilimanjaro. This Crater Lake was created as a result of volcanic eruption and its believed to be the deepest inland body of water in Africa. Lake Chala is protected by crater walls which are about 100 meters high and its fed by underground springs flowing from Mount Kilimanjaro. Views from the Rim of the crater are breath taking. Depending on the time of year, the colour of water varies from Deep Blue, Turquoise or Green. A walk by the shore of Lake Chala is an experience that lasts for a long time as it connects you with real nature. www.crocodileracers.com
